

Stedi Stock Item # 1201 or 1211

Nut: To attach
Handle when no
Optical Device is
attached

The Stedi Stock® is an ultra Light Weight Shoulder brace for Cameras, Range Finders, Spotting Scopes & Video Cameras.

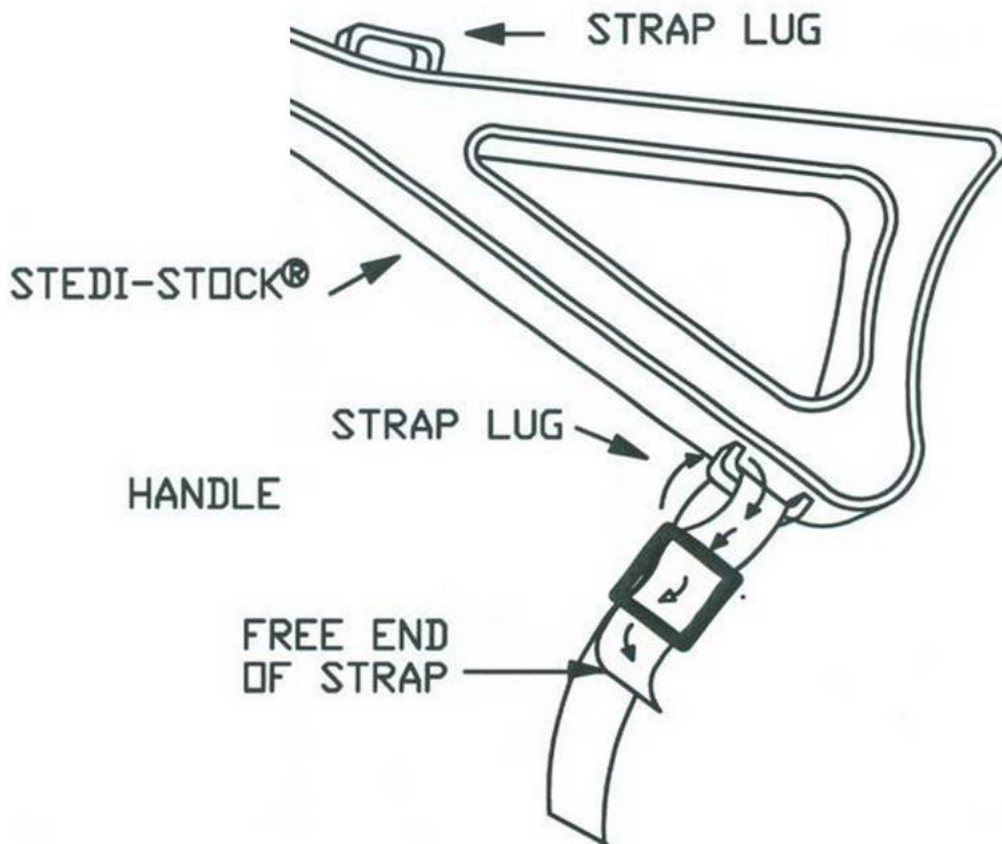

Instructions: Remove the Nut from the threaded rod atop the handle, Insert the threaded rod through one of the three holes in the stock (depending upon eye relief required) Attach the desired optical device to the threads protruding through the stock and use the handle to tighten to the desired tension.

NOTE: Stedi-Stock® is designed to attach to any optical device with a standard 1/4x20 threaded receptacle. Nut is provided to keep the handle attached to the stock when not mounted to an optical device.
