Attaching Optical Device to Stedi Stock

Optical Device mounts to the Stedi Stock by removing the packaging nut and utilizing the through bolt to attach the optical device to the stock, tighten snugly. The handle may be inserted in any one of the three holes in the stock to adjust the eye relief.

Attaching Optical Device to Stedi Stock II

Optical Device mounts to the Stedi Stock II By utilizing the protruding 1/4x20 thread attachment and tighten the thumb nut to desired tension. Eye Relief may be adjusted by loosening the thumb nut and sliding the optical device to desired location and re-tighten the thumb nut.

NOTE: Stedi-Stock® is designed to attach to any optical device with a standard 1/4x20 threaded receptacle. This product is designed to support cameras, range finders, spotting scopes or video cameras not in excess of 15 lbs, any other use of this product other than design intent voids all warranties stated or implied.

Agonic Enterprises LLC dba Stedi Stock warrants our products for the period of one Year for material or workmanship defects. Return the product to:
